Policy Document on Environment and Energy Usage

Introduction:

Conservation of environment and energy is more important than anything else for sustainability. PDUAM, Dalgaon has framed its environment and energy usage policy to manage energy in a judicious manner and to minimize its impact on the environment.

Objectives:

The main objectives of environment and energy usages policy are:

- To maintain an eco-friendly environment.
- Minimize consumption of conventional sources of energy in the college campus.
- To use alternate source of energy.
- To create environmental awareness among the students and stakeholders.
- Minimize the use of plastic materials.
- Increase plantation coverage at least above 35%.

Guidelines:

A. Audit Conduction:

- **Green audit:** PDUAM, Dalgaon has conducted Green audit and decided to do this on regular basis.
- **Energy audit:** The institution will have Energy audit conducted by authorized agency to find out the status of energy utilization of the college.

B. Energy Conservation: Implementing energy saving techniques is ensured that the lights and fans are switched off by Grade IV staff after completion of the last lecture of the day. More use of LED lights and power efficient appliances like A.C., Refrigerators, Inverters (Minimum 3 star and above) etc. instead of conventional lights and appliances. Classrooms are made with sufficient windows and ventilation so that the use of electricity can be minimized. This shows the institution's commitment towards energy conservation.

C. Alternative source of energy: Installation of Solar panels, solar lights to minimize the use of electricity.

D. Awareness programmes beyond the campus: Environment awareness programmes will be carried out at nearby areas and adopted village.
